

Donaghys Southland Chelate Custom Blend

Donaghys Southland Chelate Custom Blend is a liquid mineral supplement for dairy cows from pre-calving through lactation.

- Provides a balanced blend of 5 essential trace elements that are important to ensure optimum health, immunity, fertility and productivity can be achieved.
- Liquid custom blend of trace element minerals made to customer's requirements.
- The minerals in Southland Chelate Custom Blend are supplied as organically bound chelates (with the exception of Selenium).
- Ready to use liquid formulation.
- Trace element levels per 5mL daily dose:

Zinc	250 mg	Cobalt	10.0 mg
Copper	100 mg	Selenium	15.0 mg
Iodine	8 mg		

DIRECTIONS FOR USE:

- 5mL Southland Chelate Custom Blend per cow per day should be administered from approximately one month prior to calving through to the end of mating.
- Depending on individual herd nutritional requirements, Southland Chelate Custom Blend may be continued post-mating through lactation.
- Shake or stir well before administering Donaghys Southland Chelate Custom Blend through a calibrated dispensing system.
- Some minerals in this formulation are at a higher level than other Donaghys standard minerals. See full product label for more information.
- See label for full information.
